

WORKSHOP

“Comment éviter une procédure d’autorisation?”

22 mars 2018
SNCP, Vitry-sur-Seine

Accueil 10:00
Introduction: 10:30

“Comment prévenir une inclusion à la liste candidate?”

Classification harmonisée des substances (CLH)
SVHC roadmap: du screening à la Risk Management Option analysis (RMOA)
Le rôle de l’évaluation des substances (CoRAP/PACT)
Que faire pour améliorer la qualité des dossiers d’enregistrement? Quels arguments utiliser pour prévenir l’inclusion à la liste candidate?
Success stories

“Comment éviter l’inclusion à l’Annexe XIV?”

Préparation d’un *shadow scoring*,
Risk Management Option analysis
Scope de l’autorisation et ses exemptions
last application & sunset dates
Success stories

Q&A session

Syndicat National du caoutchouc et des polymères

60, Rue Auber 94408 Vitry-sur-Seine

Rencontrer les experts

Meglana Mihova, Managing Partner.

Meglana has 16 years of experience working on REACH and other substance related legislation such as RoHS, and Plant protection.

She has been helping companies to evaluate the impact of REACH on their business, to prepare and implement management plans for compliance. She helped companies to develop and implement successful advocacy strategy which resulted in mitigating risks for prioritization, restriction and evaluation of substances under REACH and getting positive authorization outcome.

She was involved in DEHP restriction dossier, in 'deprioritization' of ADCA, Cobalt salts, HDDA, cadmium and its compounds and in the preparation diglyme authorization dossiers. Furthermore Meglana worked on ED related aspects in the dossiers of DEHP, Cadmium (REACH) and Amitrol and flutianil (PPP) and is a recognised global expert on ED issues.

She served 3 terms as Chair of the Environment committee of the American Chamber of Commerce to the EU. She is currently a member of the Amcham EU Operations Group.

Meglana was a lecturer at various conferences and seminars and she is a regular contributor to REACH Navigator and Chemical Watch.

Meglana Mihova has a Master degree in international and European law from the University Paris II Pantheon-Assas and from the Institute of High International Studies, Paris.

She speaks Bulgarian, Russian and French.

Blandine Bichon, Account Director

As a chemical engineer and with 17 years of practice in industry, Blandine brings to EPPA knowledge and experience from one of the most important European industry sector and one of its most heavily regulated.

Her senior positions in petrochemicals and bio-chemicals with international companies have given her significant expertise in chemicals legislation such as REACH in Europe, but also other global inventories and regulated markets such as cosmetics, food contact materials, ROHS, drinking water treatment chemicals, food processing aids, mining and oil extraction legislation, biocides etc.

She spent almost 4 years with the French chemical industry association 'Union des Industries Chimiques'.

In the past years, she prepared comments to public consultations notably for borates and D4/D5, worked on registration dossiers cleaning up to reduce scores of substances in the scope of prioritization and she has authored or co-authored 6 AoAs for trichloroethylene, arsenic trioxide, arsenic acid, chromium trioxide and diglyme applications. Furthermore she is co-author of 4 CSRs on Diglyme, Arsenic trioxide, Chromium trioxide and Sodium Dichromate.

She speaks French and English.

EPPA

EPPA has over 20 years of track record on REACH, RoHS, pesticides and biocides including dozens of projects requiring authorisation procedures at EU, national and pan-European level. We have submitted a very large number of the first REACH authorisations dossiers, defended 58 RoHS exemptions, the positive evaluation of more than 15 active ingredients under the PPP legislation advising the majority of the agrochemical industry and worked on the derogations to the cut-offs under the BPR.

Since 2003 EPPA has been helping companies to comply with REACH. We help companies to evaluate the impact of REACH on their business, anticipate policy and regulatory risks to their substances and analyse costs of alternative authorisation strategies. We have a unique expertise in the REACH authorisation system and an in-house methodology for drafting socio-economic analysis and analysis of alternatives.

EPPA's environment consultants have an extensive knowledge of delegated and implementing acts which are the cornerstone procedure in substances approval.

EPPA has developed an excellent network including key EU and national officials, business associations and stakeholders responsible for chemical policies in Europe. Its consultants have an extensive knowledge of all EU substances approval procedures.

Our team of economists are recognised experts and are active members of ECHA's [NERSAP](#) Network of REACH SEA and AoA practitioners.

EPPA is your trusted political consultancy partner on chemical matters in Europe.
